Deb, Let's talk about what additional information we might want to provide to City/County of Denver, and to CDPHE, for that matter.

Thanks,
Steve

Hi, Paula! Attached is a copy of Denver's approved SOP. However, as you probably know, the regs may change here pretty soon. But... this is what we have at the moment. If you have questions or comments, please contact our asbestos project manager, Steve Gonzales who has been copied on this email. He can also be reached at 720 865 5447.

Thanks and stay warm out there!! ☺

Lisa

Matt – EPA would like to see a copy of the SOP for dealing with asbestos in soils as part of the MMP – please send a copy of this SOP ASAP for our review. Thank you.

Subject: High Street Outfall

Fonda and Paula,

I am submitting this Materials Management Plan for the High Street Outfall project. This city storm sewer project will be through OU2 of the VB/I-70 Superfund site and therefore an MMP will be required.

Apparently City of Denver is updating its SOP for dealing with asbestos in soils. I think we are all waiting for the CDPHE rule-making hearing on this issue, which occurs next week. So this portion of the MMP is missing but will be included/updated by City of Denver before the project kicks off. This will fall within the purview of CDPHE Solid Waste, so will not need to be reviewed by you folks, to my understanding.

Let me know if you would like a word version, hard copy, or anything at all. Please call with questions. Thank you.
